

# StaySure™

Fecal Incontinence Insert

## Clinically Proven Protection Against Fecal Incontinence—At Home

*StaySure™ is a first-of-its-kind, self-administered rectal insert designed to prevent accidental bowel leakage (ABL) in individuals with fecal incontinence (FI). It offers a non-surgical, easy to use at-home solution backed by rigorous science and real-world use.*

### The Innovation Behind StaySure™

At the core of StaySure™ is a **patented, fluid-filled, body-conforming design** that creates a complete internal seal—**effectively preventing leakage and associated odor**.

Developed in collaboration with **world-leading gastroenterologists** and **engineered for daily use**, StaySure™ addresses a critical unmet need in FI management.

- ✓ **Liquid-filled Silicone** gently conforms to anatomy
- ✓ **Flexible and soft** for optimal comfort and anatomical fit
- ✓ **Secure external retainer** ensures reliable placement without irritation
- ✓ **Designed for mobility, discretion, and comfort** throughout the day

### Backed by Clinical Evidence <sup>[1]</sup>

A prospective, controlled clinical study found that StaySure™:

- **Significantly reduced the frequency** of fecal incontinence episodes
- **Improved quality of life** scores in participants with moderate to severe FI
- **Was well tolerated**

*Clinically proven safe and effective, StaySure™ offers an immediate, non-invasive option for patients seeking real relief.*

<sup>[1]</sup> A Study to Assess the Effects of the Minnesota Medical Technologies Anal Insert Device in Fecal Incontinence. NCT#03898778

## Designed by Listening. Backed by Science.

StaySure™ was developed by listening to what patients want most from an incontinence solution:

- Worry-free workdays
- Confidence in social settings
- A full night's sleep without anxiety

These insights shaped a product that is as practical as it is effective—bringing dignity and confidence back to people living with FI.
